

# INTERNATIONAL COURSE BY ERIC VAN DOOREN, DDS

## Advanced Soft Tissue Management in the Esthetic Zone: Surgical and Prosthetic Concepts

This course will focus on surgical and prosthetic techniques in anterior single tooth implant restorations. Participants will be able to follow 2 live surgeries and simulate implant placement combined with connective tissue grafting via hands-on model activities during a 2-day course.

### PROGRAM

The course will be presented in English

- > Theoretical course: in depth explanation of surgical and prosthetic protocol for anterior implant treatment
- > Live surgery: implant placement in healed or extraction site, using the guided surgical protocol / connective tissue grafting and provisionalisation
- > Live prosthetic treatment: optimizing soft tissue design on model and transferring to the clinical environment
- > Hands-on: implant placement and soft tissue grafting on model, both in healed site and extraction site
- > New developments in prosthetic materials and surgical procedures

### DETAILS

November 18-19th, 2015

Venue: Tavernierkaai, 2 / 8th floor / 2000, Antwerpen / Belgium

### BIO

Dr. Eric Van Dooren is one of Europe's leading specialists; successfully combining periodontics, prosthodontics and dental implantology. He is also one of the co-developers of the new V3 implant concept. Dr. Van Dooren is in private practice in Antwerp, Belgium and Director of the onsite professional training center there. He is co-author of numerous books and an esteemed lecturer worldwide.
